I have received outstanding service from IP House, they are always happy to go above and beyond and I'm confident in all aspects of the facility, from power and security to connectivity and service - nothing is too much for them! They have a secure space for our infrastructure deliveries, which is covered with a roof. This means bringing equipment in and out of the building regardless of weather conditions is never an issue. They also offer excellent logistical benefits like forklifts to help with off-loading and heavy deliveries. Dual, resilient power is supplied as standard, as you would expect. Multiple security protocols are in place to ensure the building is protected to the highest standard. Due to the location, the connectivity options available are second-to-none, you won't be able to find many places that can offer faster speeds or better service.

IP House are very quick to setup, their customer service is outstanding – they customise to the clients needs, not only do they have full and half racks but quarter racks are also available ... Many data centres don't provide this! They have a highly secure facility, ultra-fast connectivity and resilient power.

They are everything you'd expect from a data centre.

We required a solution that was not the standard setup that IP House provide, and needed it quite urgently. The team were very accommodating and were able to provision the required solution quickly with a custom power configuration which was still provided with full resilience. The customer service was excellent throughout. Despite being a secure facility, access procedures were simple to follow and there were no problems accessing the facility at any time required. They were also able to receive and securely store a number of large deliveries during installation. Their flexibility was appreciated and highly recommended.'
