

Schneider Electric Introduces Easy UPS 3L 500 and 600 kVA to Make Business Continuity Easy with Optimised Investment

- Extends medium Easy UPS 3-phase UPS range up to 600 kVA (400V) for external batteries
- Compact 3-phase UPS simplifies and streamlines configuration, use, and service
- Ideal for medium and large commercial buildings and light industrial applications
- EcoStruxure™ Ready to simplify management and services with anytime, anywhere monitoring and service support via smartphone

London, United Kingdom, July 7th, 2020 – [Schneider Electric](#), the leader in digital transformation of energy management and automation, today announced the introduction of Easy UPS 3L, the newest part of the Easy UPS 3-phase Uninterruptible Power Supply (UPS) range, extending the medium range to 500 and 600 kVA (400V) for external batteries. Available in all regions that support 400V except China and Japan, the Easy UPS 3L simplifies and streamlines configuration and service, delivering high availability and predictability to medium and large commercial buildings, data centres, and light [industrial UPS](#) applications.

With its compact footprint, highly available parallel and redundant design, and robust electrical specifications, Easy UPS 3L protects critical equipment in a wide range of environments from damage due to power outages, surges, and spikes. It is up to 96% efficient to bring predictability to utility costs. Easy UPS 3L includes a wide battery voltage window and accommodates a variety of battery configurations including battery banks. It comes with a full range of options and accessories making it easy to integrate into different environments.

“Thanks to an exceptional combination of competitive specifications; robust, flexible, and fault-tolerant design that enhances availability; and an optimised footprint that saves valuable real estate, the Easy UPS 3L is the ideal choice for easy business continuity and optimised investment, whether it’s on your shop floor or in your electrical room,” said Mustafa Demirkol, Global VP, 3-Phase UPS Offer Management & Marketing, Schneider Electric. “It is easy to configure, easy to use, and easy to service. By further extending the Easy UPS 3-phase range, Schneider Electric continues to fill a market need by offering easy, robust, and competitive solutions that prioritise safety, efficiency, and availability for today’s connected businesses.”

Customers benefit from Schneider’s global service setup with strong local networks of service specialists that provide customers with a complete range of services throughout the entire Easy UPS 3L lifecycle. The start-up service is included to ensure the Easy UPS 3L is properly and safely configured for best performance, reliability, safety, and peace of mind.

Simple to configure, use, and service, Easy UPS 3L:

- Offers resiliency against harsh environments with conformal coated printed circuit boards, replaceable dust filter, operating temperature of up to 40°C, and strong overload protection, all of which make Easy UPS 3L a reliable solution for business continuity.
- Provides less system complexity and saves on CapEx investment, making it ideal for medium and large commercial buildings and light industrial applications.

- Enables easy monitoring and management with EcoStruxure IT's cloud-based software suite when you buy the optional network card. For more information, visit www.schneider-electric.com/ecostruxure-it and try EcoStruxure IT Expert monitoring solution for free for 30 days.

About EcoStruxure

EcoStruxure is our open, interoperable, IoT-enabled system architecture and platform. EcoStruxure delivers enhanced value around safety, reliability, efficiency, sustainability, and connectivity for our customers. EcoStruxure leverages advancements in IoT, mobility, sensing, cloud, analytics, and cybersecurity to deliver Innovation at Every Level. This includes Connected Products, Edge Control, and Apps, Analytics & Services which are supported by Customer Lifecycle Software. EcoStruxure™ has been deployed in almost 500,000 sites with the support of 20,000+ developers, 650,000 service providers and partners, 3,000 utilities and connects over 2 million assets under management.

From energy and sustainability consulting to optimizing the lifecycle of your operational systems, we have world-wide services to meet your business needs. As a customer-centric organization, Schneider Electric is your trusted advisor to help increase asset reliability, improve total cost of ownership, and drive your enterprise's digital transformation towards sustainability, efficiency, and safety.

About Schneider Electric

At Schneider, we believe **access to energy and digital** is a basic human right. We empower all to **make the most of their energy and resources**, ensuring **Life Is On** everywhere, for everyone, at every moment.

We provide energy and automation digital solutions for efficiency and sustainability. We combine world-leading energy technologies, real-time automation, software and services into integrated solutions for Homes, Buildings, Data Centers, Infrastructure and Industries.

We are committed to unleash the infinite possibilities of an open, global, innovative community that is passionate about our **Meaningful Purpose, Inclusive and Empowered** values.
